bi	Temporary building are those which	ch are intended to serve the purpose temporarily for a short period and without proper masonary foundation and superstructure usually such

structures are buildings of bamboo, jungle wood-posts cadjans or grass thatching provided (Katcha Sheds).

Semi-permanent buildings. These structures are those provided with masonary foundations and superstructure but provided with jungle wood or cheaper variety for wood work for roof work generally roofed with coconut leaves. The type of construction is such that the structure can be made permanent with suitable alterations such as providing permanent roofs doors and windows etc.

In certain cases, material employed for roof work can be dismantled and routed in other locality such as building provided with masonary foundations and dwarf of walls and partitions for room but roofed over with tubular or portal frame trusses with A.C. or C.C.I. sheet which could be dismantled and routed.

Permanent Structures are those built with approved quality of buildings materials and according to specifications as permanent structures.
